

RAD ROBOTS

Robotics demo with local community member and former engineer Howard Drake

Saturday, March 3
10:30 to 11:15 p.m.

Are you crazy about cyborgs? Bonkers for bionics? Join us for a robotics demonstration as we learn about robots built from LEGO “Mindstorms” kits, including talking turtle robots that can read, and a robot that carries the Earth around the Sun to show the four seasons. We’ll learn what skills are required to build a robot, then play with the robots ourselves! Ages 7+ and their families
