

Community Garden Planting Party

Saturday, May 12
10 a.m.

Help us plant kale, chard, cherry tomatoes, peppers, and basil seedlings for this year's community garden! We will also enjoy a garden-themed read aloud (for the younger children in attendance), have a fresh veggie tasting, and plant individual peat pot flowers for families to take home and replant! The garden box was made possible by support from Harvard Pilgrim Health Care. All seedlings, compost and technical garden support provided by the Worcester Regional Environmental Council (REC).

For families with children of all ages.

Branch Sponsored by:
